Web Developer, Product Team Lead, Changemakers

Ashoka

Rareş Pamfil

MPA student at LSE

“ Monica joined the Changemakers team in the midst of a large upgrade project (Drupal 7). From the beginning, she showed tremendous motivation, commitment to the organization and the project, and a willingness to learn. I was transitioning out when she joined the team, but thanks to her qualities, she was able to oversee the project through the end. In addition to her ability to understand Drupal and create complex web architecture, she is also very sensitive to user needs and business challenges. What I appreciated most about her was her sincere and warm personality. She is keen to work with people of all types and from all backgrounds - and become friends with them along the way. **less** ”

Misha Baranivsky

Independent Program Development Professional

“ Monica was my direct manager and accepted feedback on code submissions. She was very good at identifying what I needed to do and then explained tasks and issues in a way that was easy to implement. She helped me by acting as an intermediary between my work on the code and the many different demands from her greater team, and helped protect my time for only mission critical updates. **less** ”
